

Voraxor w/Residuals Preplant Burndown Arlington, WI 2024

Trial Information

Trial Sponsor: BASF

Objective: Evaluate the performance of ***Voraxor** tank mixed with residuals compared to other commercial standards for preplant burndown control of winter annuals

Crop: Soybean

Hybrid: XO 2444E

Weed species (pressure): dandelion (moderate)
glyphosate-resistant marestail (moderate-high)
shepherd’s purse (low-moderate)

Herbicide Application(s): Preplant – 4/24

Voraxor** is a new herbicide offering from BASF containing two group 14 active ingredients, saflufenacil and trifludimoxazin. ***Voraxor is not registered for commercial use in the United States at the time of this publication.

For the full report see trial #24-ARL-SB10 in the [2024 Wisconsin Weed Science Research Report](#)
